Jayden Leuciuc

Email | Github | LinkedIn | Website

Skills:

Java, Javascript, React.Js, Gatsby.Js, Node.Js, Html, Css, Sass, Firebase, GraphQl, Git, Jest

Projects:

Online Store App | Code | Preview

- Project built utilizing React, Redux, Firebase, Stripe api, and Node.js.
- Learned how to authenticate users through Firebase and use Redux for state management. Integrated a backend with Node.js to use the Stripe API for mock payments.

Github User Search App | Code | Preview

- Project built using React, GitHub API, Auth0, and FusionCharts.
- Learned how to destructure data from GitHub api, design an authentication system with Auth0, style information with fusion charts.

Covid Tracker App | Code

- Project built using React and Sass.
- Learned how to destructure data given from a Covid 19 API with axios. Organized and styled information with FusionCharts.

Password Manager Service App | Code

- Project built using React and Sass.
- Learned how to structure a multi-page application using React. Sass used to style.

Achievements:

2019 Competition Top 3 Award - CodeTN

- Designed and developed the front end functionality of the website
- Learned how to communicate with backend developers and to make changes based on feedback

Complete React Developer 2021 Certificate - Zero to Mastery Academy

- Built projects within the complete react ecosystem to create enterprise-grade applications

Foundations of User Experience Design Certificate - Google

- Practiced techniques related to user experience and design with accessibility in mind

Education:

University of Tennessee, Knoxville (Spring 2022 - Present)

Major: Computer Science

GPA: (N/A)

Farragut High School (2018 - Fall 2021)

GPA: 4.3 / 4.0
